FERRARI
LAFERRARI

KEY FACTS

- Ferrari extended battery warranty until September 2025
- One of the lowest mileage examples worldwide, with a recorded mileage of 170km from new
- Finished in the incredible and rare color combination of Argento Nürburgring over a Carta da Zucchero interior
- Full service history and Ferrari Yellow Book

HISTORY

Every few years, Ferrari surprise the world with a state-of-the-art, limited-production supercar, a car which not only breaks records, but also reinforces the manufacturer's identity and desirability. Their last masterpiece, the 'LaFerrari', was introduced to the world in 2013 at the Geneva Auto Show. Billed as the "definitive" Ferrari, the LaFerrari displayed all the know-how of the engineers and designers at Maranello. Internally called the F150, it was developed based on findings from testing the FXX development prototype. It is Ferrari's first in-house modern design as well as its first hybrid road-going car: its naturally aspirated V12, coupled to a HY-KERS system, develop the mind-blowing power of 963 PS and a combined torque of 900 Nm. Only 500 LaFerrari coupes were built, an extremely low production number in today's world of "mass "produced super-and hypercars and today it represents an important fifth chapter to the great 288 GTO, F40, F50 and Enzo lineage.

OUR LAFERRARI

Delivered new in November 2015 through the German dealer Lueg Sportivo GmbH to its first owner, a German businessman, our LaFerrari was finished in the incredible and rare color combination of Argento Nürburgring over a Carta Da Zuccherio interior. Specified from new with the rare Opaco Carbon fibre option throughout and the four-point harnesses, chassis 214691 leaves no wish unanswered.

Our LaFerrari spent its whole life in Germany and is currently one of the lowest mileage examples worldwide, with a recorded mileage since new of 170km. Presented in as-new condition, our example has been consistently serviced over the years, as documented per service history:

24.08.2017 – 107km – Lueg Sportivo GmbH

05.10.2018 – 108km – Lueg Sportivo GmbH

20.01.2021 – 127km – Maranello Motors GmbH

25.02.2022 – 131km – Maranello Motors GmbH

24.02.2023 – 150km – Maranello Motors GmbH

Benefitting from the all-important Ferrari Hybrid Battery Warranty until September 2025, our LaFerrari is currently available for immediate purchase with us in Munich. This is a chance that shouldn't be missed as the collectability and market value of these is constantly on the rise.
